NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(For the year ended on December 31, 2025)

1. 1. GENERAL INFORMATION

1.1 Structure of ownership

Vinacomin - Minerals Holding Corporation, formerly known as Vietnam National Minerals Corporation, is a State-owned Corporation, established under Decision No. 1118/QD-TCCBDT dated October 27, 1995 of the Ministry of Heavy Industry (currently the Ministry of Industry and Trade).

In 2005, Vietnam National Coal and Mineral Industries Holding Corporation Limited (Vinacomin) was established under Decision No. 345/2005/QD-TTg dated December 26, 2005, by the Prime Minister, based on the merger of the Vietnam Coal Group and the Vietnam Minerals Holding Corporation and operates according to the Charter approved by the Prime Minister in Decision No. 228/2006/QD-TTg dated October 11, 2006. Accordingly, the Vietnam Minerals Holding Corporation was transformed into Vinacomin Minerals Holding Corporation and became a subsidiary of the Vietnam National Coal and Mineral Industries Holding Corporation Limited.

In 2006, Vinacomin Minerals Holding Corporation transitioned to operate under the parent-subsidiary model according to Decision No. 12/2006/QD-BCN dated April 27, 2006, by the Ministry of Industry (now the Ministry of Industry and Trade), and operates under the State-Owned Enterprise Business Registration Certificate No. 0106000168, with the third amendment registered on May 3, 2007, and the Corporation's charter capital being VND 719,749,730,244.

In 2010, the Corporation changed its name to Vinacomin Minerals Holding Corporation - One Member Company Limited, with the abbreviated name Vinacomin Minerals Holding Corporation and it operates under Business Registration Certificate No. 0100103087, initially issued by the Hanoi Department of Planning and Investment on July 1, 2010, with the fourth amendment on August 21, 2012, and a charter capital of VND 1,350,000,000,000.

In 2015, the Corporation officially transitioned from a state-owned enterprise to a joint-stock company, now known as Vinacomin - Minerals Holding Corporation, and operates under Business Registration Certificate No. 0100103807, with the eighth amendment on April 28, 2021.

The Corporation's head office is located at 193 Nguyen Huy Tuong, Thanh Xuan Trung Ward, Thanh Xuan District, Ha Noi City, Vietnam.

The charter capital of the Corporation, according to Business Registration Certificate No. 0100103807, amended for the 9th time on May 7, 2024, is VND 2,000,000,000,000 (In words: Two trillion Vietnam dongs (only)).

The Corporation's shares are listed on the UPCOM with the stock trading code KSV on July 28, 2016.

On December 20, 2022, the Hanoi Stock Exchange issued Decision No. 856/QD-SGDHN regarding the approval for the listing of VIMICO's shares.

On December 28, 2022, the Hanoi Stock Exchange issued Decision No. 872/QD-SGDHN regarding the cancellation of the registration for trading VIMICO's shares on the UPCOM market, as they had been approved for listing on the Hanoi Stock Exchange. Accordingly, the last trading day on the UPCOM system was January 16, 2023.

1.2 Business line and principal activities

The main activities of the Corporation are:

- Surveying, exploring, and investigating geological resources of minerals;
- Mining of minerals, non-ferrous metals (tin, lead, zinc, copper, aluminum), ferrous metals (iron, manganese, chromium, titanium), non-metallic minerals, rare minerals (rare earth elements, gold, silver, platinum, gemstones), and materials used in jewelry such as pearls and coral; selecting, smelting, processing all kinds of minerals; manufacturing jewelry, artistic products, and industrial goods from minerals and metals;

- Research and application of technology in the field of exploration, gem metallurgy, gold, and pearl jewelry manufacturing;
- Training experts in gemology, technicians in the processing of precious stones, gold, pearls, and jewelry;
- Import-export of minerals, processed products from minerals, gemstones, gold, pearl jewelry, and materials and equipment for the mining and processing of minerals, gemstones, gold, and jewelry;
- Construction of mining-industrial projects and civil works;
- Investment and construction consultancy in mining and mineral processing;
- Hospitality services, office rental, and transportation services;
- Transportation business of other goods, transportation of goods by train, car and inland waterway;
- Business of domestic and international travel services and tourist services (excluding business of karaoke rooms, discotheques, bars);
- Container shipping agent;
- Import-export of chemicals (excluding state-prohibited chemicals), animal feed and feed additives, fertilizers, construction materials, water filtration powder, beer, alcohol, rubber, and other products derived from rubber.
- Other business activities are registered and added according to legal regulations.

1.3 Operating characteristics of the business during the period that affect the interim consolidated financial statements

1.4 Corporate structure

The Corporation has subsidiaries that are consolidated into the financial statements for the year ended December 31, 2025, including:

Name	Address	Interest ratio	Voting rights ratio	Business sector
Vimico - Cao Bang Bang Giang Traveland And Trading JSC	Cao Bang	51.31%	51.31%	Travel and hotel services
Lao Cai Iron and Steel Investment JSC - Vimico	Lao Cai	99.01%	99.04%	Production and processing of iron and steel

---	---------	--------	--------	------------------------------

2. ACCOUNTING POLICIES, ACCOUNTING PERIOD AND CURRENCY USED IN ACCOUNTING

2.1 BASIS OF PREPARING THE CONSOLIDATED FINANCIAL STATEMENTS

The consolidated financial statements of the Corporation are prepared in accordance with the Enterprise Accounting System issued together with Circular No. 200/2014/TT-BTC dated December 22, 2014, by the Ministry of Finance, Circular No. 53/2016/TT-BTC dated March 21, 2016, by the Ministry of Finance amending and supplementing certain provisions of Circular No. 200/2014/TT-BTC on guidance for the Enterprise Accounting System, and Circular No. 202/2014/TT-BTC dated December 22, 2014, on the guidance for preparing consolidated financial statements.

The fiscal year begins on January 1 and ends on December 31 of each calendar year. These consolidated financial statements are prepared based on the consolidation of the financial statements for the period from January 1, 2025, to December 31, 2025, of the Parent Company and its subsidiaries. Internal transactions and balances have been eliminated in the preparation of the consolidated financial statements.

2.2 CURRENCY USED IN ACCOUNTING

The accounting currency is Vietnamese Dong (VND).

3. SIGNIFICANT ACCOUNTING POLICIES

The following are the significant accounting policies applied by the Corporation in the preparation of these financial statements:

3.1 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The accounting policies used by the Corporation in preparing the financial statements for the period from January 1, 2025, to December 31, 2025, are applied consistently with the policies applied in preparing the financial statements for the fiscal year ended December 31, 2024.

3.2 ACCOUNTING ESTIMATES

The preparation of the financial statements in compliance with Vietnamese Accounting Standards requires the Board of Directors to make estimates and assumptions that affect the reported amounts of liabilities, assets, and the presentation of contingent liabilities and assets at the date of the financial statements, as well as the reported amounts of revenues and expenses during the financial year (operating period). Actual business results may differ from the estimates and assumptions made.

3.3 CASH AND CASH EQUIVALENTS

Cash and cash equivalents include cash on hand, demand deposits with banks, pledged deposits, margin deposits, short-term investments with original maturities of no more than 3 months that are highly liquid, easily convertible into known amounts of cash, and subject to minimal risk of changes in value due to fluctuations in exchange rates.

3.4 ACCOUNTS RECEIVABLE

Receivables are presented in the financial statements at the carrying value of receivables and the provisions made for doubtful debts.

Provisions for doubtful debts are made for each receivable based on the aging of overdue debts or the anticipated level of losses that may occur.

The Corporation makes provisions in accordance with Circular No. 48/2019/TT-BTC dated August 8, 2019, by the Ministry of Finance, providing guidance on "Provisions for inventory impairment, impairment losses on financial investments, doubtful debts, and product, goods, and construction service warranties in enterprises."

3.5 INVENTORY

Inventory is valued at the lower of cost and net realizable value. The cost of inventory includes purchase price, direct material costs, direct labor costs, and overhead or other related costs, if any, to bring the inventory to its current location and condition. The cost of inventory is determined using the weighted average method. The net realizable value is the estimated selling price less the costs to complete and the costs of marketing, selling, and distribution.

The cost of inventory sold for production and business purposes is calculated using the weighted average method. Inventory is accounted for using the perpetual inventory method.

The Corporation makes a provision for inventory impairment based on evidence of impairment in value (such as obsolescence, damage, or poor quality) of inventory under its ownership at the end of the accounting period. Any increase or decrease in the provision for inventory impairment is recognized in the cost of goods sold in the period.

3.6 FIXED ASSETS, FINANCIAL LEASED FIXED ASSETS

Fixed assets are presented at cost less accumulated depreciation.

The cost of fixed assets includes the purchase price and all other directly related costs necessary to bring the asset into its intended condition for use.

Finance lease assets are initially recognized at cost, which is the fair value or the present value of the minimum lease payments (if the fair value is higher than the present value of the minimum lease payments) plus any directly attributable initial costs related to the finance lease transaction (excluding VAT). During their use, finance lease assets are recognized at cost, accumulated depreciation, and the carrying amount. Depreciation of finance lease assets is calculated based on the lease term as per the lease agreement and is charged to production and business expenses to ensure full recovery of the capital.

The depreciation rate is determined by the straight-line method, based on the estimated useful life of the asset, in accordance with the depreciation rate prescribed in Circular No. 45/2013/TT-BTC dated April 25, 2013 of the Ministry of Finance on the management, use and depreciation of fixed assets and Circular No. 147/2016/TT-BTC dated October 13, 2016 of the Ministry of Finance on amending and supplementing a number of articles of Circular No. 45/2013/TT-BTC

The cost of construction in progress is determined based on the final settlement value of the project upon completion. If a fixed asset has been put into use but not yet settled, it is recorded at an estimated cost, and adjustments are made after the project settlement is completed. In cases where the final settlement of the completed project differs from the estimated value, the Corporation will adjust the cost of the asset based on the approved final settlement value without adjusting the depreciation expenses already recorded from the time the asset was completed and put into use until the settlement is approved.

3.7 FINANCIAL INVESTMENTS

Held-to-maturity investments include: term deposits with banks, other investments held to maturity with the purpose of earning periodic interest income.

Investments in joint ventures and associates: are initially recorded in the accounting books at cost. After initial recognition, the value of investments presented in the Consolidated Financial Statements is determined at cost less provision for impairment (if any).

Investments in equity instruments of other entities include: investments in equity instruments of other entities that do not have control, joint control or significant influence over the investee. The initial book value of these investments is determined at cost. After initial recognition, the value of these investments is determined at cost less provision for impairment (if any).

Provision for Impairment of Investments: A provision for impairment of investments is made at the end of each reporting period if there are indications that the investments may have been impaired. The provision is calculated in accordance with the guidelines provided in Circular No. 48/2019/TT-BTC dated August 8, 2019, issued by the Ministry of Finance on "Guidance on the Provisioning and Use of Provisions for devaluation of inventories, Financial Investments, Bad Debts, and Product Warranty, Goods, and Construction Services."

3.8 BORROWING COSTS

The borrowing costs include interest expenses and other costs directly related to the borrowings of the Corporation.

Borrowing costs directly related to the purchase, construction, or production of assets that require a relatively long period to complete and ready for use or operation are capitalized as part of the asset's cost until the asset is put into use or operation. Any income earned from the temporary investment of borrowings is deducted from the related asset's historical cost.

All other borrowing costs are recognized in the Income Statement as they occur.

3.9 PREPAYMENT

Prepaid expenses related to the production and business costs of a financial year or a business cycle are recognized as short-term prepaid expenses and are expensed in the current financial year.

Expenses that have been incurred in relation to the results of business operations over multiple accounting periods are recorded as prepaid expenses and allocated gradually to the business results in the following accounting periods.

The calculation and allocation of long-term prepaid expenses into production and business expenses for each accounting period is based on the nature and extent of each type of expense in order to choose an appropriate allocation method and basis. Prepaid expenses are gradually allocated into production and business expenses using the straight-line method.

Business advantages arising from the privatization of state-owned enterprises are allocated gradually over a period not exceeding 10 years.

3.10 ACCRUED EXPENSES

Expenses that have not yet been incurred but are estimated and accrued in advance into production and business costs during the period are made to ensure that when the actual costs arise, they do not cause a sudden increase in production and business costs. This is done based on the principle of matching revenue and expenses. When these costs are incurred, if there is a difference between the accrued amount and the actual cost, the accounting department will adjust by either increasing or decreasing the expense to reflect the difference.

3.11 EQUITY

The owner's equity is reflected based on the actual amount contributed by the owners.

The shareholders' contributed capital is recorded at the actual price of the share issuance and is shown separately under two items: Owner's capital contribution and capital surplus. Owner's capital contribution is reflected at the par value of the shares, while capital surplus reflects the difference between the par value and the issuance price of the shares (including cases of reissuing treasury shares).

Retained earnings represent the profit from the company's operations after deducting (-) adjustments for retrospective changes in accounting policies and retrospective adjustments for significant errors from previous years. Retained earnings may be distributed to investors based on their capital contribution ratio after being approved by the General Meeting of Shareholders.

Dividends payable to shareholders are recorded as liabilities in the company's balance sheet after the resolution of the General Assembly regarding dividend distribution and the notification of the dividend entitlement date from the Vietnam Securities Depository Center.

3.12 REVENUE AND EXPENSE RECOGNITION

Revenue is recognized when the Corporation has the ability to receive economic benefits that can be reliably determined. Net revenue is determined based on the fair value of amounts received or to be received, after deducting trade discounts, sales discounts and sales returns. At the same time, revenue is recognized when the following conditions are met:

Revenue from Sale of Goods

Revenue from the sale of goods is recognized when all of the following conditions are met:

- *The significant risks and rewards of ownership of the goods have been transferred to the buyer;*
- *The Company no longer retains control over the goods as if it were the owner or has the ability to control the goods;*
- *Revenue can be reliably measured;*
- *The Company has received or will receive economic benefits from the sale transaction;*
- *The costs incurred for the transaction can be reliably measured.*

Revenue from Providing Services

Revenue from the provision of services is recognized when the following conditions are met:

- *Revenue can be reliably measured;*

- *Economic benefits from the service transaction are likely to be received;*
- *The portion of work completed as of the balance sheet date can be determined;*
- *The costs incurred for the transaction and the costs to complete the service provision can be determined.*

Revenue from Financial Activities

Revenue from interest, royalties, dividends, profits received, and other financial revenues is recognized when both of the following conditions are met:

- *Economic benefits from the transaction are likely to be received;*
- *The revenue can be reliably measured.*

Operating expenses and cost of goods sold

Operating expenses incurred, which are related to the generation of revenue during the period, are recognized based on actual expenses and estimated in accordance with the accounting period. The cost of goods sold is transferred in accordance with the recognized revenue and ensures the prudence principle.

3.13 FOREIGN CURRENCY

Transactions denominated in foreign currencies are converted at the actual exchange rate at the date of the transaction. The resulting exchange rate differences are recorded in the income statement.

The exchange rate differences arising from the revaluation of balances at the end of the period, after offsetting the increases and decreases, with the remaining difference recorded in financial income or financial expenses for the period.

Specifically:

- The actual transaction exchange rate applied when recognizing and revaluing assets is the buying exchange rate of foreign currencies at the transaction date, as provided by the banks conducting the transactions at the time of preparing the financial statements. For foreign currency deposits in banks, the actual exchange rate for revaluation is the buying rate of the bank where the foreign currency account is held.
- The actual transaction exchange rate for revaluing foreign currency-denominated monetary items classified as payables is the selling exchange rate of the foreign currency at the bank conducting the transaction at the time of preparing the financial statements.

The exchange rate gain from revaluing foreign currency liabilities at the end of the period is offset against the exchange rate loss from revaluing other foreign currency liabilities. After offsetting, if there is a gain, it is recognized as other income for tax calculation purposes. If there is a loss, it is recognized as an expense in the cost of business operations when determining taxable income.

This translation follows the technical accounting language, ensuring clarity for professionals familiar with financial reporting. Let me know if you need any further adjustments.

3.14 TAX RECOGNITION

Current corporate income tax expense is calculated based on taxable income for the year. Taxable income differs from the net profit presented in the Income Statement because it excludes income or expenses that are taxable or deductible in other years, and also does not include non-taxable items or non-deductible items.

Corporate income tax is calculated at the applicable tax rate at the end of the accounting period, which is 20% on taxable income.

According to the Investment Incentive Certificate No. 554/BKH/PTDN dated January 26, 2005, issued by the Minister of Planning and Investment to the Vietnam Minerals Group: the Group is entitled to corporate income tax incentives under Decree No. 164/2003/NĐ-CP dated December 22, 2003. Under this decree, the project is subject to a 20% tax rate and is exempt from tax for the first 3 years from the date of taxable income, with a 50% reduction in tax payable in the following 7 years, and exemption from land use fees for 15 years.

The determination of the corporate income tax for the Group is based on current tax regulations. However, these regulations may change periodically, and the final determination of corporate income tax is subject to the inspection results by the competent tax authority.

Other taxes are applied according to the current tax laws in Vietnam.

3.15 FINANCIAL INSTRUMENTS

Initial Recognition

Financial Assets

At the time of initial recognition, financial assets are recorded at cost plus any directly attributable transaction costs incurred in the issuance or acquisition of the financial assets. Financial assets include cash, deposits with credit institutions, receivables from customers and other receivables, and other financial assets.

Financial Liabilities

Financial liabilities are initially recognized at cost plus any directly attributable transaction costs related to the issuance of the financial liabilities. The Corporation's financial liabilities include accounts payable to suppliers, other payables, loans, and accrued expenses.

Subsequent Measurement

Currently, there are no regulations regarding the revaluation of financial instruments.

3.16 RELATED PARTIES

Parties are considered related if one party has the ability to control or exert significant influence over the other party in making decisions about financial policies and operations. The related parties of the Company include:

- Enterprises that have control, or are controlled directly or indirectly through one or more intermediaries, or under common control with the Vietnam Coal and Mineral Industry Group (TKV) include the Group, its subsidiaries, and its joint ventures and associates.
- Individuals who have the right to vote directly or indirectly in the reporting entities, leading to significant influence over these entities, as well as key management personnel who have the authority and responsibility for planning, managing, and controlling the activities of the Group, including close family members of these individuals.

In considering the relationships of related parties for the purpose of preparing and presenting the consolidated financial statements, the Group focuses on the substance of the relationships rather than the legal form of those relationships.

4. ADDITIONAL INFORMATION

(Notes to financial statements attached).

5. OTHER INFORMATION

Vinacomin - Minerals Holding Corporation made retrospective adjustments to the opening balances of certain items due to Thai Nguyen Non-Ferrous Metals Company having revised its 2024 financial statements following the 2025 Annual General Meeting of Shareholders, as follows:
